

GETTING READY FOR A GREEN FUTURE

Circular manufacturing basically stands for a vision where all materials are reused, so raw materials are no longer lost and waste no longer exists. This is currently not yet the reality of the day, but it is a development that is coming. Condor Grass is therefore engaged in a future vision of circular production . Not only because it is the future, but also to contribute to a necessary social development.

Naturally, we include our vision of circular production in our quotations, but we would certainly also like to exchange ideas with you about it!

Part of the Condor family

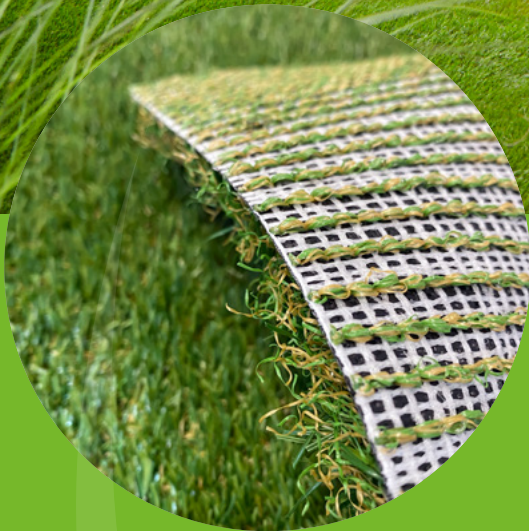

Over the years we have grown to become one of the largest carpet producers in Europe, with an annual production of more than 140 million m² of textile floorcovering. The Condor Group is a family business focusing on a transparent and long-term relationship with suppliers, employees and customers, with the aim of creating long-term value for the entire chain.

REPEAT
OUR NEXT LEVEL BACKING

- 🔄 Easily **recyclable** (100% polyolefin)
- 🐾 **Child- & petfriendly** (EN 71-3 cat. 3)
- 📏 **Flexible backing** with excellent bonding properties (EN 12228:2013)
- 💧 Improved **water permeability** (EN 12616:2023)

THE NETHERLANDS

MADE IN HASSELT, NL

More than passion for Grass

Condor Grass produces artificial grass for Landscaping, Leisure and Sports. With decades of experience, a leading position has been won in the landscape market and a Dutch quality product is supplied at an internationally competitive price. Condor Grass offers every imaginable artificial grass solution, from balcony grass to FIFA-certified football pitches.

Proven top quality

It goes without saying that high quality is required. For this reason many products are manufactured from renowned yarns from companies such as TenCate and Mattex. This lays the foundation for top quality, now and in the future.

Green is in our DNA

As a large artificial grass manufacturer we are aware that our ecological footprint on the world is large. That is why we conform to the 17 Sustainable Development Goals (SDGs) of the United Nations and are taking significant steps towards a circular world. Our sustainable ALLOA artificial grass, which is fully recyclable and consists largely of recycled matter, is just one small achievement to underline this.

ADVANTAGES

THE SIX BENEFITS AT A GLANCE

Easily **recyclable** (100% polyolefin)

Repeat is an artificial grass backing, made of 100% polyolefin and can therefore be more easily recycled. After years of playing fun, it is easily removed, separated and shredded. The granulate can then be used for new products.

1

Child- & petfriendly (EN 71-3 cat. 3)

Our artificial grass is child-friendly and safe for pets, tested to the strict EN 71-3 category 3 standard. Play carefree with the knowledge that the grass is free of harmful substances and meets strict safety standards.

2

Flexible backing with excellent bonding properties

The lack of a latex backing ensures optimum strength. It provides an flexible backing that has excellent bonding properties. Independently conducted tests according to EN 12228:2013 Method 1 prove this.

3

Improved water permeability (EN 12616:2023)

Clever engineering has taken the water permeability of Repeat products to the next level. During the extensive testing (EN 12616:2023) we carried out, we saw a substantial optimisation compared to a regular backing.

4

Closed-cell coating

Our artificial grass has a closed-cell coating that prevents urine from being absorbed. This means the grass does not retain unpleasant odours and is easy to clean. Enjoy a fresh and hygienic play environment for both children and pets.

5

Incredibly strong pile anchorage

The unique composition of our Repeat products makes them unprecedentedly strong. Through extensive independent testing, our artificial grass proves to meet the highest standard. As a result, the product offers excellent pile anchorage (>25N, ISO 4919:2012).
